Address: Chennai, India

SUMMARY

Final-year Computer Science and Engineering student with hands-on experience building machine learning and full-stack applications using Python, JavaScript, React.js, Flask, and FastAPI. Experienced in developing REST APIs, machine learning pipelines, predictive models, and responsive web applications through projects in water quality analysis, customer churn prediction, and smart city engagement.

EDUCATION

SRM Institute of Science and Technology **2023 – 27**
B.Tech · Computer Science and Engineering
CGPA - 7.06/10

SKILLS

Programming Languages:	Python, C, C++, JavaScript, SQL, TypeScript
Web Technologies & Frameworks:	HTML, CSS, React.js, Flask, FastAPI
Domain Knowledge:	DSA, DBMS, OOP, Operating Systems, Computer Networks
Machine Learning & Data Science:	Machine Learning, Deep Learning, Predictive Modeling, Feature Engineering, Model Training, Model Evaluation, NumPy, Pandas, Scikit-learn, XGBoost, PyTorch
Tools & Technologies:	Git, GitHub, Docker, MySQL, SQLite

PROJECTS

AquaAI – Water Quality Analysis System Link **Mar 2025 – Present**
HTML, CSS, JavaScript, Pandas, NumPy, Scikit-Learn, PyTorch *Artificial Intelligence & Machine Learning*
Flask, SQLite, Flask-SQLAlchemy, Anthropic Claude API

- Developed a water quality analysis system using deep learning models for prediction tasks.
- Implemented dual neural networks for water safety classification and disease prediction.
- Built REST APIs using Flask to enable model access and integration.

Customer Churn Prediction Platform Link **Jan 2026 – Present**
Python, Pandas, NumPy, Scikit-Learn, XGBoost, FastAPI, Streamlit, MySQL, Docker *Machine Learning & Data Analytics*

- Developed a customer churn prediction platform using XGBoost to identify customers likely to discontinue a service.
- Built a machine learning pipeline for data preprocessing, feature engineering, model training, and prediction.
- Developed FastAPI services, Streamlit dashboards, and Dockerized deployment with MySQL integration.

Smart City Engagement Platform Link **Jan 2026 – Present**
React.js, TypeScript, Vite, Tailwind CSS, React Router, Context API, npm *Web Development*

- Built a Smart City platform using React, TypeScript, and Vite for complaint registration and tracking.
- Implemented navigation and state management with React Router and Context API, including admin features.
- Designed a responsive UI using Tailwind CSS for smooth and efficient user experience.
